HLC Afternoon Enrichment Program will be held on school days from September 19th to May 19th from 11:30 to 3:00. Children enrolled in 3 and 4 year old classes may attend any or all afternoon sessions.

Join us for afternoons of fun with HLC's Enrichment Program!

Fantastic Friends- Cooperation, Empathy, Integrity, Respect, Responsibility, Tolerance and Kindness. The focus of this unit is to provide the tools and life skills children need to develop these traits. We will use fun

stories, puppets, role playing and games to get children thinking and communicating.

Fabulous Farm- Experience a fun-filled adventure learning about the exciting world of farms and farm animals. Learn about where food comes from. Plant fruit and vegetable seeds, make jam, bake bread,

churn butter, square dance, collect eggs or taste some home-made ice cream. Pretend to be farm animals and farm hands. Come on down and join us for fun on the farm.

Games, Games, Games! Games and activities are more than just fun for preschoolers— they also offer rich in learning opportunities. We will play games that master new skills and concepts, such as: number and

shape recognition, grouping and counting, color recognition, eye-hand coordination and manual dexterity. And playing games will teach important **social skills**, such as communicating verbally, sharing, waiting, taking turns, and enjoying interaction with others.

Christmas Around the World - Get ready for the ultimate class fieldtrip! Each day the students will board the Heritage "Airplane" and take off to visit a different country to find out about how they celebrate the birth of baby Jesus. We will

investigate many Christmas Traditions through song, story, dancing, cooking and art.

Let's Get Moving! This month we will develop and encourage the gross motor skills of our young children. Our preschool children will have an opportunity to sing a little louder and move a little larger as we explore active play!!

Space Adventures NEW - Blast off with us as we orbit around the sun and discover all about our solar system. Explore the stars and planets and create your very own constellation. Build and launch your own rocket. And pretend to be an astronaut flying through outer space. To infinity and beyond!

Jungle Safari - Tigers, lions, monkeys and tree frogs all live in the jungle. But what is a jungle? How do they grow? Did you know jungles can be found in many very warm countries? Have you ever gone on a safari? What

kinds of animals might we see on a safari through the jungle? We will explore all this and much more as we learn all about the mysteries of the deep exotic jungle.

Leap into Literature- Children love a good story! Good stories create a positive experience that leads to a lifetime of reading enjoyment. But how are books made? How are the illustrations created in

different books? How does a book receive a Caldecott medal? This month we will look at lots of favorite stories and compare illustrations, and narrative styles. We will select our favorites and all work towards creating our own class book.

Incredible Insects- NEW- Get ready to explore and learn about all sorts of 6 legged creatures! In this unit we will learn about insect body parts and build our own bugs. We will pretend to be insects as we learn about pollination.

And we will go on a nature walk to look for and observe insects in our world.

Lights, Camera, Action! - Ready set action... it's your chance to perform as we learn the art of acting and build self confidence. The children will act out familiar stories and learn about music, dance & the art

for scenery. Mini performances will take place throughout the month.
